JANUARY/JANVIER

ARTICLES

Ray Skinner and Ken Wong Actions and propagators for massless Dirac fermion fields in two-dimensional space-time 1

Winston Roberts A 1^{++} partial wave exists in two-gluon and(or) photon fermion pair transmutation 11

H. A. Rafizadeh Complex force-constant dependence of elastic constants 14

Hamid A. Rafizadeh Mechanical and structural properties of metallic glasses 23

Won-Sang Chung and Jae-Kwan Kim A new property of superstring tree amplitude 34

D. K. Basak, S. K. Sarkar, N. Mukherjee, S. Sanyal, B. Ghosh, and N. Chaudhuri Lateral distribution and energy spectra of high-energy muons in cosmic-ray air showers 41

Y. K. Lee and I. M. Kim The relaxation function of the spin van der Waals model in a weak magnetic field 49

D. G. C. McKeon Mapping the axial current onto the hypersphere 54

Jian-Jun Xu Interfacial wave theory of dendrite growth: global mode solution and quantum condition 58

H. Khushnood, A. R. Ansari, M. Irfan, and U. Ali Some interesting features of charged particles produced in high-energy hadron–emulsion collisions 67

G. Rostoker and F. Pascal Dependence of the response of the magnetosphere–ionosphere current systems on the preconditioning of the auroral oval and on the level of the solar–terrestrial interaction 74

R. G. Abraham, J. L. Booth, and F. W. Dalby Measurement of anomalous dispersion in molecular iodine vapour by a simple interferometric method 81

Robin L. Armstrong, Marcin Krupski, and Sunyu Su Effect of pressure on the temperature of the displacive to order–disorder crossover associated with the structural phase transition in K_2OsCl_6 88

T. F. Treml Remarks on the vacuum energy in interacting scalar field theory 91

T. F. Treml Path-integral approach to anomalies at finite temperature 96

B. Plenkiewicz, P. Plenkiewicz, and J.-P. Jay-Gerin Pseudopotential calculations of elastic scattering of electrons by helium atoms in the range 0–20 eV 104

A. Helaly, L. Shafai, and A. Sebak Low-frequency response of a buried object in a lossy ground 111

I. R. Dagg, A. Anderson, M. C. Mooney, C. G. Joslin, W. Smith, and L. A. A. Read Collision-induced far infrared absorption in gaseous chlorine and chlorine–argon mixtures 121

P. Hargraves, D. G. Rancourt, and A. E. Lalonde Single-crystal Mössbauer study of phlogopite mica 128

D. Kiang, T. Ochiai, Y. P. Chan, and K. Young Geometric model for multiplicity distribution in nucleus–nucleus scattering 145

FEBRUARY/FÉVRIER

ARTICLES

D. E. Brodie, S. Zhang, D. C. Craigen, and R. D. Audas a-Si:H prepared by low-energy ion beam assisted reactive evaporation 155

S. K. Bose and J. D. Poll Roton and vibron density of states in solid parahydrogen 159

Mohammad F. Mahmood HgCl $B^2\Sigma^+{}_{1/2}$ formation by low-energy electron impact dissociation of $HgCl_2$ and(or) CH_3HgCl molecules: applications to HgCl($B \rightarrow X$) laser 166

D. K. Bhattacharjee, P. J. Cherian, and D. K. Maity Asymptotic properties of multiplicity distributions in high-energy pn and pp interactions 170

Ying-Nan Chiu and Lue-Yung Chow Chiu An alternative mechanism for spin-forbidden photo-ionization of diatomic molecules and its rotation–electronic selection rules 177

M. Razavy Scattering of acoustic waves by an oscillating soft sphere 184

Alain Gire, Germaine Lomaglio, Serge Morand, Jean-Gérard Théobald, François Blanc, René Fanguin et Gaston Raoult Susceptibilités radiofréquence d'une jonction polarisée—effet d'une induction magnétique 190

Y. N. Joshi and A. J. J. Raassen Hyperfine structure for some vacuum ultraviolet lines of Tl II and Tl III 195

Heinrich Hoff One-dimensional nonlinear nonsteady state heat conduction I: general solution by perturbation theory 198

B. Stern Processus non réactifs dans les collisions $H_2 + H(2s)$ aux énergies thermiques 206

N. Rudraiah, P. V. Radhadevi, and P. N. Kaloni Effect of modulation on the onset of thermal convection in a viscoelastic fluid-saturated sparsely packed porous layer 214

R. K. Roychoudhury, Sikha Bhattacharyya, and Y. P. Varshni Large-amplitude ion-acoustic double layers in a plasma with warm ions 222

M. Sultan Parvez and F. Bary Malik A note on the determination of the nuclear charge density radius from the β decay between mirror nuclei 227

B. R. Lewis and S. T. Gibson Rotational line strengths in $^3\Sigma^+ - {}^3\Sigma^-$ electronic transitions. The $\beta^3\Sigma_u^+ - X^3\Sigma_g^-$ and $A^3\Sigma_u^+ - X^3\Sigma_R^-$ systems of molecular oxygen 231

Hoang Ngoc Long and Le Khac Huong On the photoproduction of gravitons on spinor particles 238

Gregory Light Energy inquiry 242

Manjusree Ghosh, S. K. Ghose, S. C. Das, N. Bhattacharyya, P. Chowdhuri, S. K. Sen Gupta, and N. Chaudhuri Lower energy photon cross sections near atomic shell edges 244

K. K. Mukherjee, Keka Basu Choudhury, N. Ranjit Singh, P. S. Mazumdar, and S. Brajamani Positron-impact ionization of atomic hydrogen in the distorted-wave polarized-orbital method 249

H. Ahrar Some more results from 340 GeV pion–emulsion and 400 GeV proton–emulsion interactions 253

COMMENT ON

R. F. Folse and J. C. Nieuwoudt Comment on: On a sphere performing linear and torsional oscillations in a viscous fluid 258

REPLY TO COMMENT ON

G. T. Karahalios Reply to comment on: On a sphere performing linear and torsional oscillations in a viscous fluid 259
